

COVID-19 UPDATES

As the global effect of the coronavirus (COVID-19) continues to evolve, Precise Imaging is firmly committed to the health and safety of our patients, staff and community.

We have put into place policies specifically relating to COVID-19 to proactively assure patient and staff safety, including procedures and precautions addressing staff training, patient screening, use of personal protective equipment, and adherence to environmental standards for cleaning and disinfecting all facilities and equipment. We are also actively monitoring all federal, state and local guidelines and recommendations, and are adapting and updating our policies as the circumstances continue to evolve.

Precise Imaging supports the Centers for Disease Control and Prevention (CDC) interim guidance to “reschedule non-urgent outpatient visits as necessary.” This may include screening examinations such as screening mammography and other non-urgent examinations as determined by providers and their patients.

We are open and here to care for patients.
